AI ASSISTANT FOR THE CS EURO AUTO CRM

Sales Copilot

AI that tells your sales team what to do next

Hackathon 2026

MONDAY, 9:00 AM

A salesperson opens the CRM…

91 deals in “Follow Up”

=

RM3.1M waiting for a decision

“Which one do I call first?”

Production CRM, from the demo video

OUR IDEA

Three steps become one click.

BEFORE

1 Read the record

2 Decide what to do

3 Write the email

minutes per customer (estimate)

AFTER

✦ AI Summary

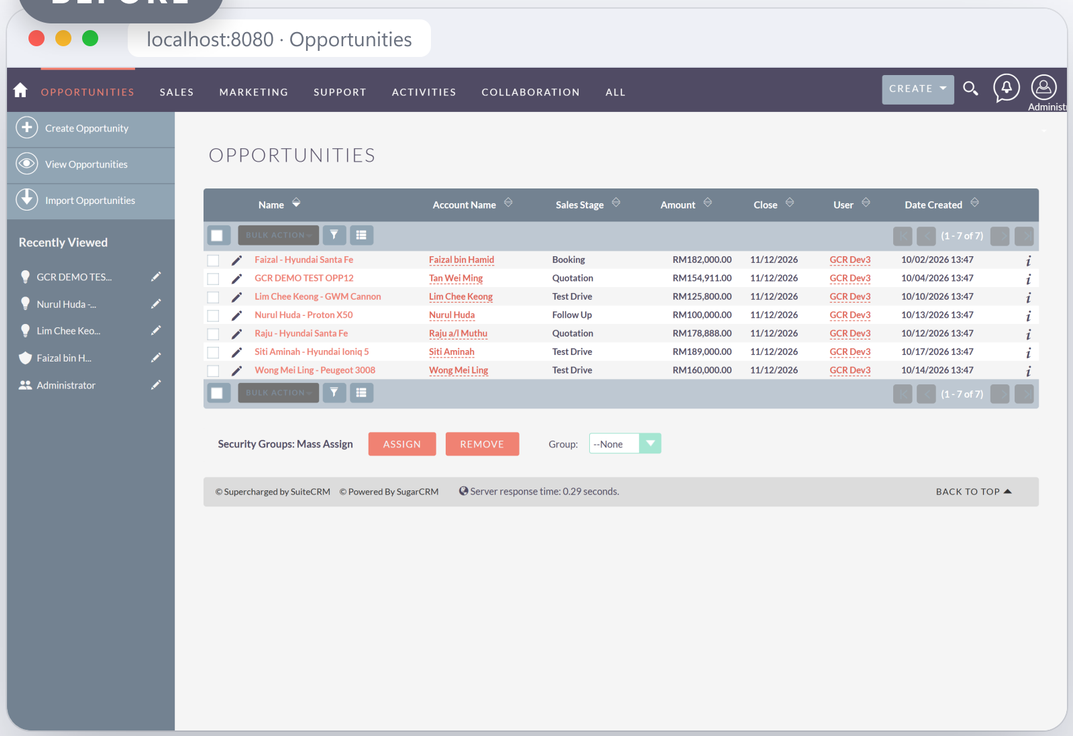

under 1 second (measured)

One assistant added to the existing page. Nothing removed.

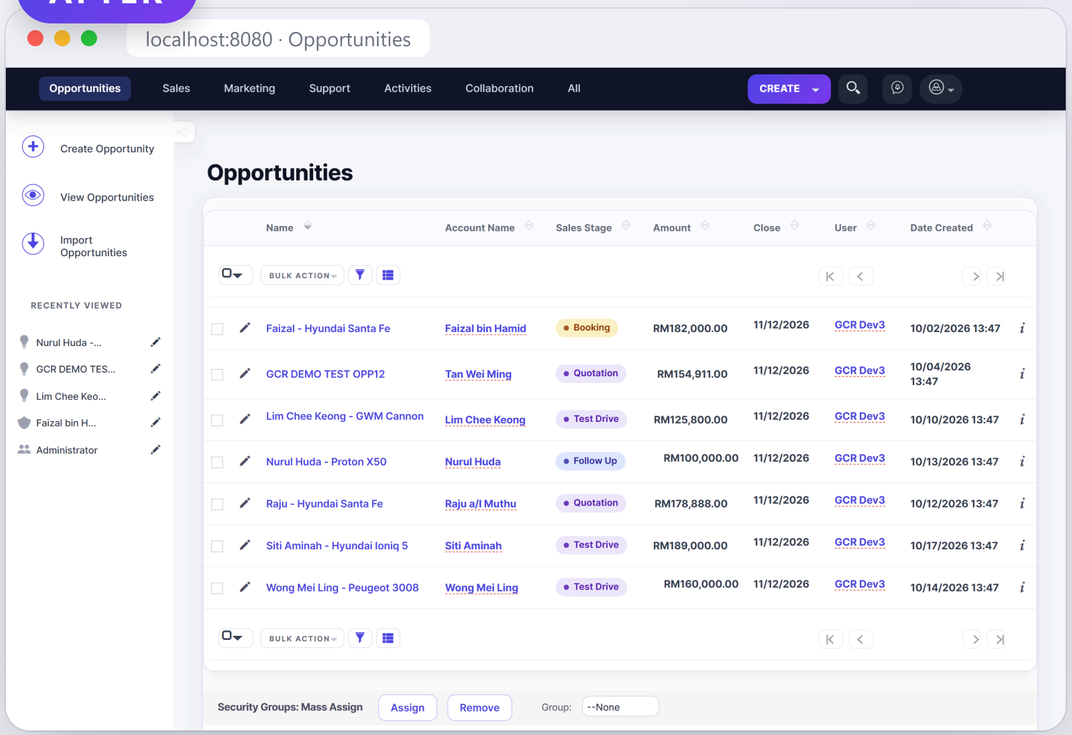

THE INTERFACE

Same CRM. A modern look.

BEFORE

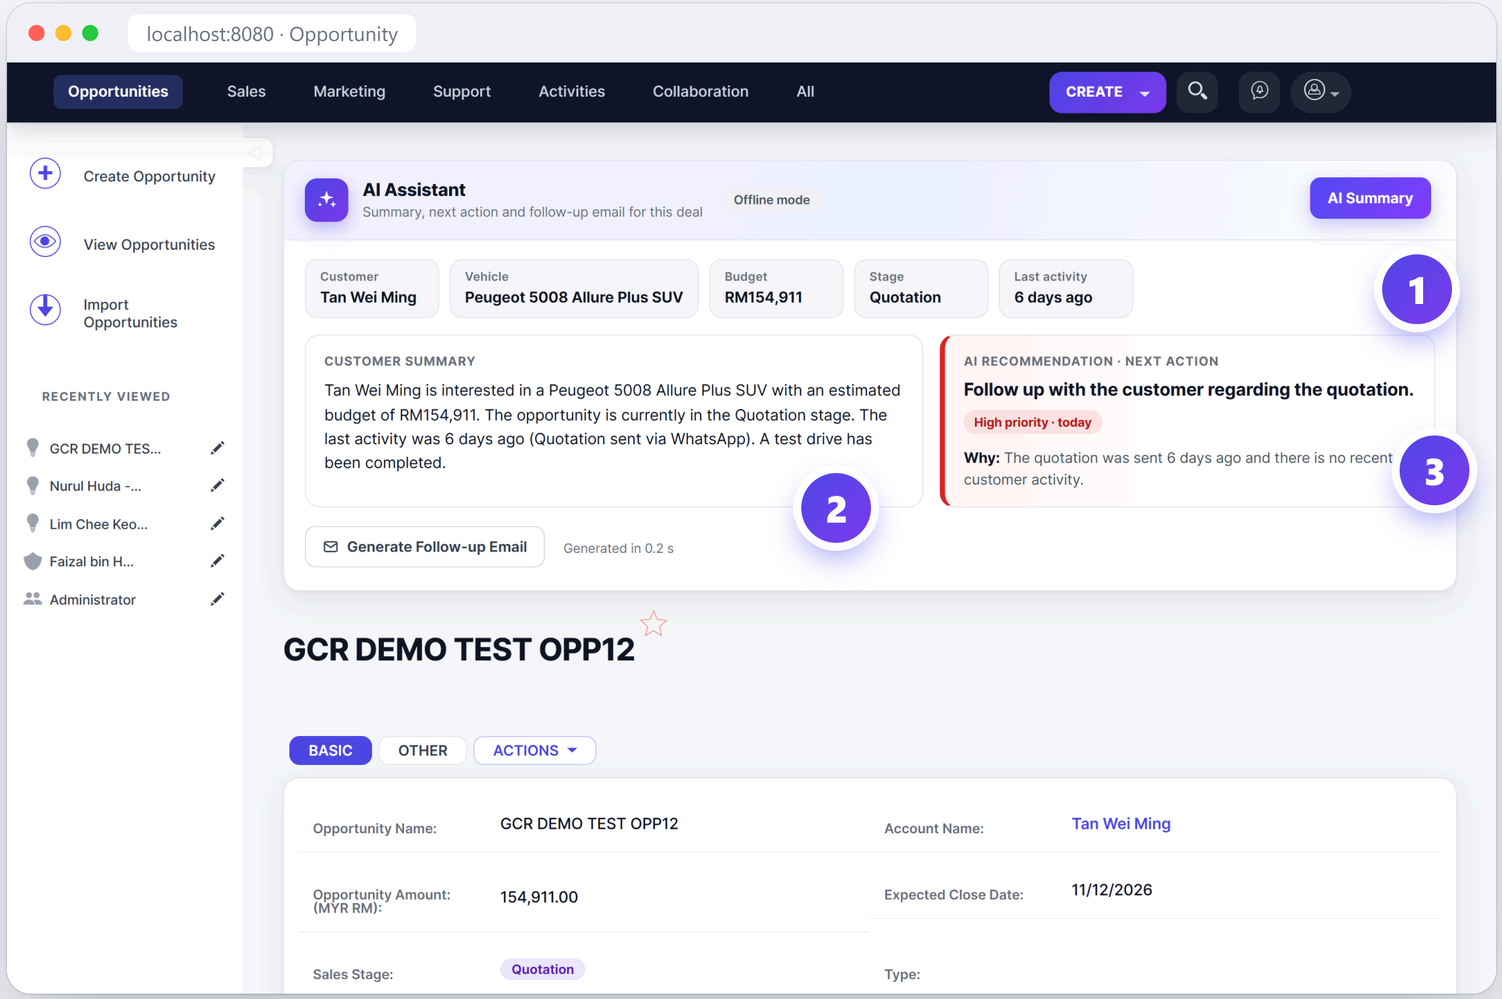

AFTER

A style layer on top of the same data and the same features. No CRM core file was changed.

FEATURE 1 + 2

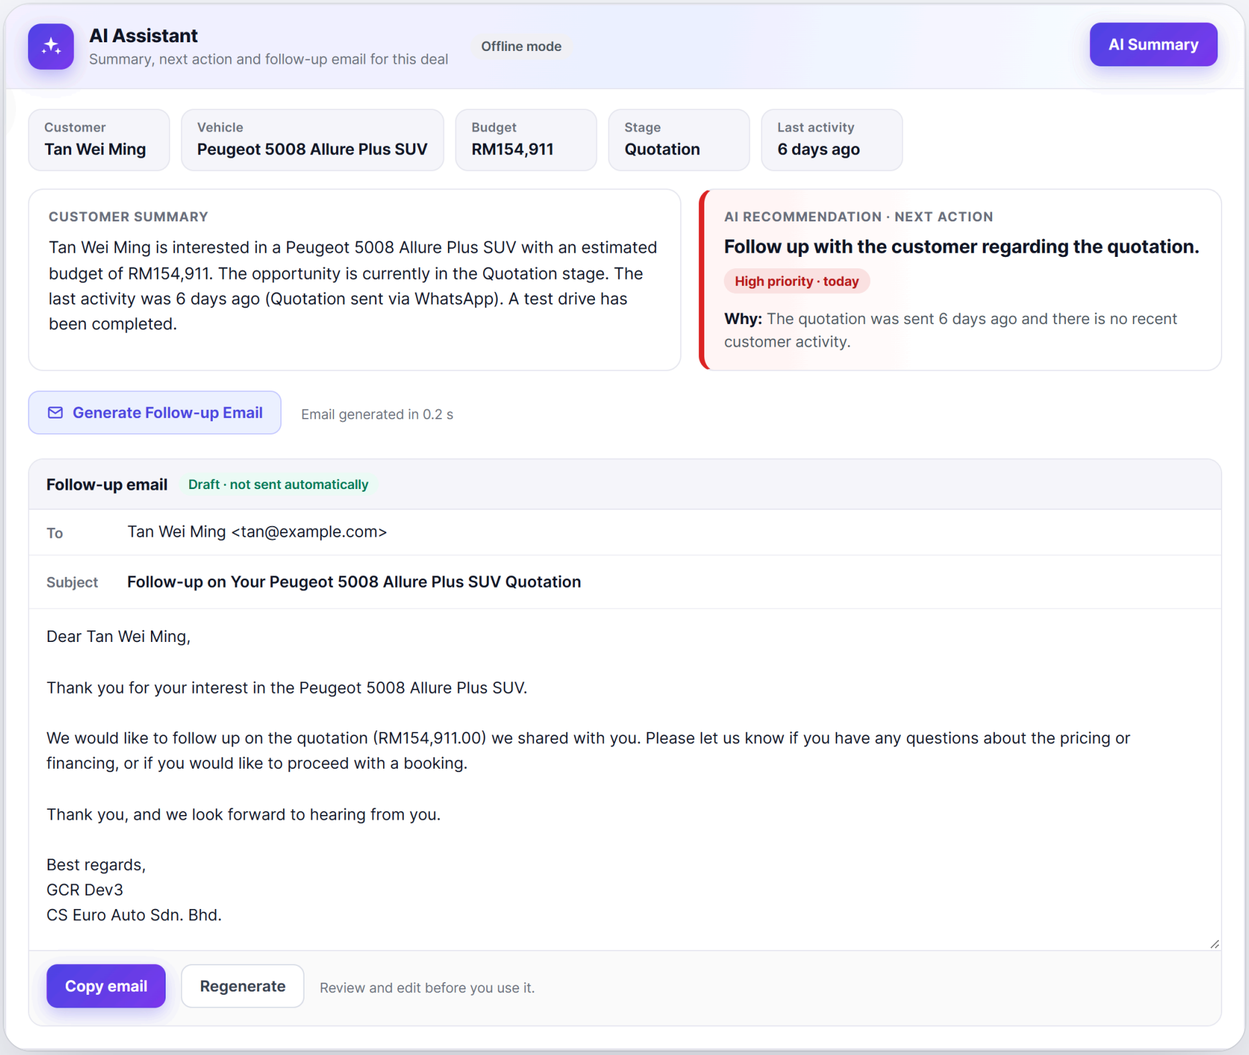

One click: summary and next action

1. **The facts at a glance**
2. **A plain-language summary**
3. **The next action, its priority and why**

FEATURE 3

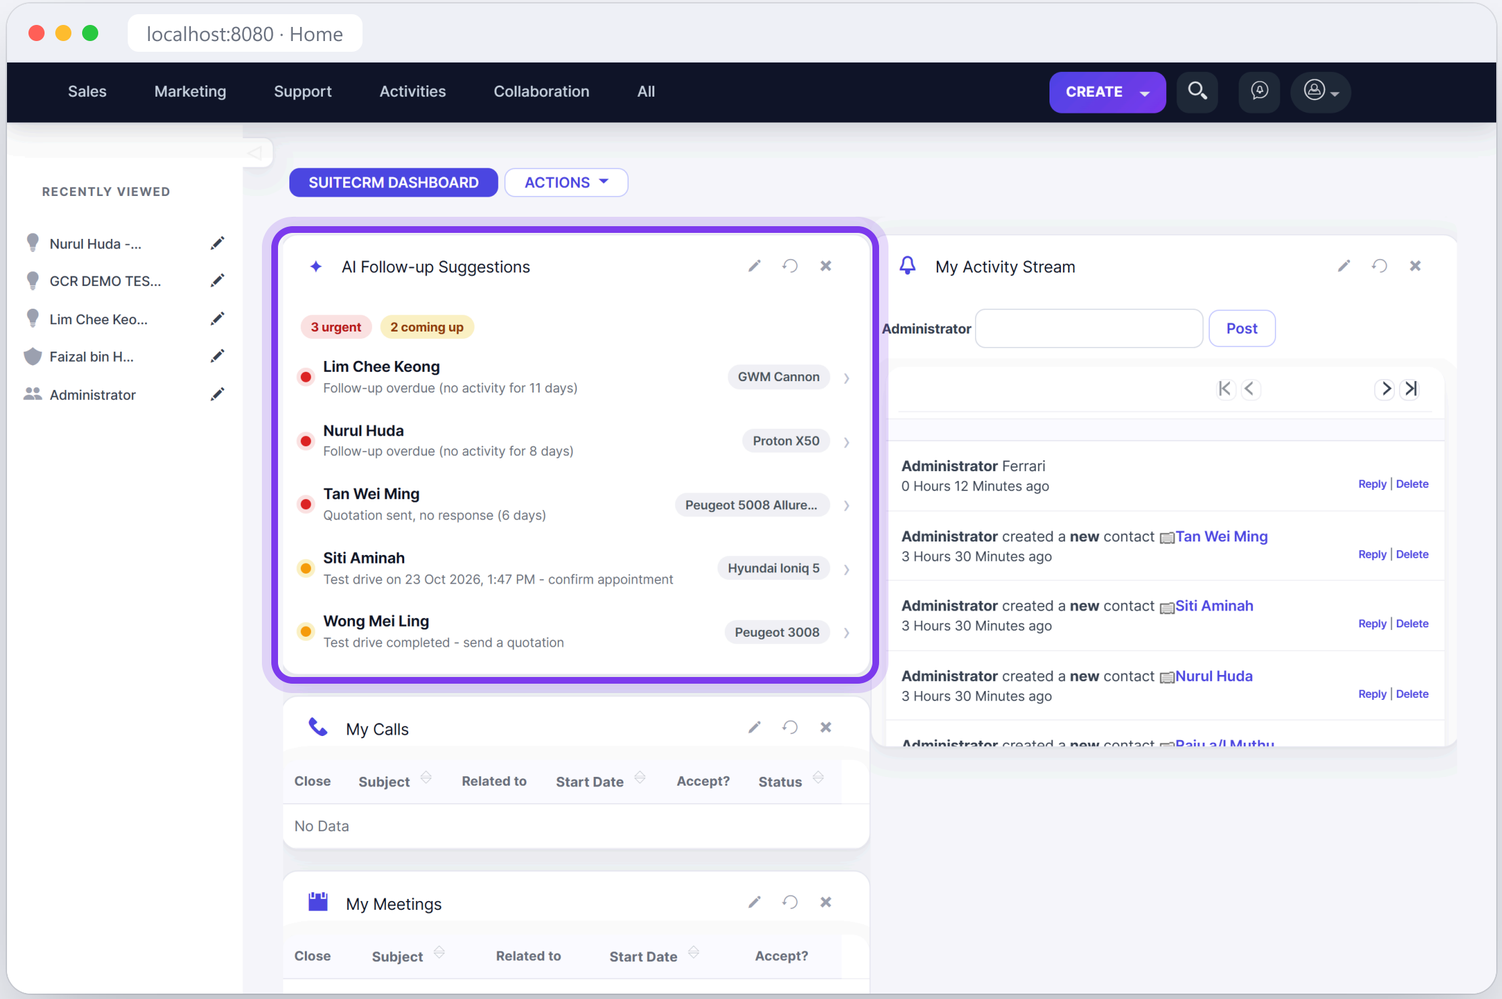

A follow-up email, ready to edit

- **Fitted to the sales stage**
- **Edit, copy or regenerate**
- **Never sent automatically**

BONUS

Who to call first

- **Urgent**
- **Coming up**
- **Click a name, the deal opens**

RESULTS

From minutes to one click

IMPACT

Minutes → under 1 second

Read, decide and write by hand (estimate) vs. one click (measured).

0.2 s
typical AI response in our demo

17
sales stages understood

NEXT

1. **Connect production data**
2. **Claude for natural writing and free-text notes**
3. **Send emails from the CRM after approval**

Today: rule-based logic on real CRM data, working end to end in the CRM. Next: a language model.

Thank you
